● SUMMARY

Full Stack Developer with 5+ years of experience building scalable web applications using React, Next.js, Node.js, and AWS cloud services. Proven track record in developing e-commerce solutions with seamless third-party integrations including Stripe, Shopify, and NetSuite. Expertise in modern JavaScript technologies, GraphQL APIs, and automated workflow solutions using AWS Step Functions. Strong focus on delivering high-quality, responsive applications with optimal performance and user experience.

● EXPERIENCE

09/2026 | Abu Dhabi

Full Stack Software Engineer | GLOBAL WEB SOLUTIONS

Developed e-commerce and tour booking platforms integrated with Shopify Storefront API, Redux state management, and multi-currency checkout systems. Created travel service portals including flight booking, visa information, desert safari, luxury car hire, and cargo booking platforms for the UAE market. Built 100+ transportation booking websites across UK & Europe using React, Next.js, and PHP with centralized multi-country architecture. Implemented SEO optimization including structured data, Open Graph tags, XML sitemaps, and Google Analytics across multiple platforms. Integrated third-party services including WhatsApp booking flows, payment gateways, and real-time availability systems.

10/2022 – 07/2025 | Kochi

Software Engineer | KORE Digital Ecommerce | GADGEON SYSTEMS INC

Front-end development using React, NextJS, Vite, and Redux for responsive user experience, including the creation of reusable components, e-commerce stores. Built and optimized scalable backend solutions using AWS services, including API development and Step Functions for workflow automation. Integrated third-party services like Stripe and Shopify for payment processing and eCommerce operations. Implemented seamless integration with logistics providers including UPS, FedEx, and 3PL for automated shipping and tracking. Integrated NetSuite for efficient order management, invoicing, and financial workflows.

03/2022 – 09/2022 | Malappuram

Software Engineer – Full stack | TECHZERA INFOLOGIES PVT LTD

Built APIs using Node.js for e-commerce applications. Designed user interfaces and admin dashboards with React, focusing on responsive and user-friendly experiences. Ensured smooth integration between APIs and UI components for seamless functionality.
